# Vehicle Towing

The Owner's Manual contains both general and detailed specific information relating to the vehicle's ability for the towing of trailers and should be referenced to ensure familiarity with its contents. In addition to this information it should also be noted that for the New Zealand market the maximum permitted vertical load exerted by the trailer drawbar on the ball head of the towing bracket must not exceed the values as stated and shown for each model type below.

Different trailer types and different trailer manufacturers have varying towball downloads. The customer should always contact the trailer manufacturer for information as to the maximum download weight.

Volkswagen does not recommend the fitting of load levelling or weight distribution devices when used with a Volkswagen Genuine towbar. When fitted and used correctly, the Volkswagen Genuine towbar is capable of meeting the towbar/towball capacities as stated and shown for each model type below.

## (1) Towing Capacity

 **Note: Towbar capacities must not be exceeded. Volkswagen New Zealand recommends the use of a Genuine Volkswagen Accessory Towbar. Volkswagen New Zealand does not endorse or will not be held liable for any claim, loss or damage arising from the use or fitment of electronic**
